SUMMARY

Motivated Junior Frontend Developer with hands-on experience building responsive, interactive web applications using React.js, JavaScript (ES6+), and Tailwind CSS. Skilled in REST API integration, reusable component architecture, and modern development workflows with Git/GitHub. Comfortable working across the full frontend build process, from UI implementation to state management, and eager to contribute in a professional software house or paid frontend internship.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)

Frontend: React.js, Tailwind CSS, React Router, Responsive Web Design

API & Data: REST API Integration, Axios, AJAX

Tools: Git, GitHub, Vite, VS Code, Cursor AI

Additional: jQuery, React Icons

PROJECTS

Stayora — Property Booking Platform

Tech Stack: React.js, Vite, Tailwind CSS, React Router, Zustand, Framer Motion, React Leaflet, React Hook Form, Zod, date-fns

- Built an Airbnb-style property booking platform with advanced search and filtering by price range, property type, amenities, and guest count, using active filter chips for quick refinement.
- Implemented a split-view listing and interactive React Leaflet map with custom price markers, syncing marker highlighting to listing hover/selection and a responsive mobile "Show Map" view.
- Architected app-wide state with Zustand for wishlist and booking flow, and used React Hook Form with Zod for validated forms, complemented by Framer Motion animations and skeleton/empty states.

Netflix-Style Movie Platform

Tech Stack: React.js, Vite, Tailwind CSS, React Router, Framer Motion, Axios, TMDB API, Lucide React

- Integrated the TMDB REST API via Axios to dynamically fetch and render movie data across a rotating hero banner and categorized, horizontally scrolling content rows.
- Built movie detail pages and client-side routing with React Router, and implemented a persistent "My List" feature using Context/useReducer with localStorage.
- Delivered a responsive, streaming-style UI with Framer Motion animations and loading/error handling for a smooth browsing experience.

Spotify-Style Music App

Tech Stack: React.js, Vite, Tailwind CSS, API Integration

- Developed an interactive music player with play/pause controls and a live audio progress/timeline, closely mirroring Spotify's playback UI.
- Structured the interface around reusable React components for a clean, responsive layout across devices.

GitHub: <https://github.com/ahmadali7403/Music-App.git> • **Live Demo:** <https://music-app-phi-smoky.vercel.app/>

Instagram Clone

Tech Stack: React.js, Tailwind CSS, JavaScript

- Built a mobile-first, Instagram-inspired interface with top and bottom navigation, a stories bar, and a scrollable feed.
- Designed reusable PostCard components within a component-based React architecture for consistent, responsive rendering.

GitHub: <https://github.com/ahmadali7403/instagram.git> • **Live Demo:** <https://instagram-cyan-rho.vercel.app/>

Medium-Style Blog Platform

Tech Stack: React.js, Tailwind CSS, Axios, Dev.to API

- Integrated the Dev.to REST API with Axios to dynamically retrieve and display articles with search functionality.
- Created a responsive blog layout with clean typography and reusable React components for article browsing.
