

AHMAD ALI

Frontend Developer | React Developer

EMAIL: ahmadrafiq7403@gmail.com

LOCATION: Saray Mughal, Pattoki, Kasur, Punjab, Pakistan

TECHNICAL SKILLS

- React.js
- JavaScript (ES6+)
- Tailwind CSS
- React Router
- Axios
- Vite
- HTML5
- CSS3
- REST API Integration
- Git & GitHub
- React Icons
- jQuery
- AJAX
- Responsive Web Design

DEVELOPMENT TOOLS

- VS Code
- Git
- GitHub
- Vite
- Cursor AI

EDUCATION

BS Computer Science

7th Semester

[ADD UNIVERSITY NAME]

PROFESSIONAL SUMMARY

Motivated Frontend Developer with hands-on experience building multiple frontend applications using React.js, JavaScript and Tailwind CSS. Skilled in developing responsive, component-based user interfaces, integrating REST APIs, and implementing CRUD functionality across real-world projects.

PROJECTS

Portfolio Website — React.js, JavaScript, Tailwind CSS, React Router

- Built a modern and responsive personal portfolio website to showcase frontend development skills, projects, technical expertise, and contact information.
- Implemented reusable React components, smooth navigation, responsive layouts, animations, and an interactive contact form.

Instagram Clone — React.js, JavaScript, Tailwind CSS, React Router

- Built a responsive Instagram-inspired frontend with reusable components for stories, posts, reels and comments.
- Used React state and component-based architecture to create an interactive UI.

GitHub: <https://github.com/ahmadali7403/instagram.git> Live Demo: <https://instagram-cyan-rho.vercel.app/>

Medium Clone — React.js, Tailwind CSS, Axios, React Router

- Developed a Medium-inspired blogging platform, integrating the Dev.to API via Axios to fetch and display articles.
- Built reusable blog cards, navigation, profile and stats pages using React Router.

GitHub: <https://github.com/ahmadali7403/medium-clone1.git> Live Demo: <https://medium-clone1-7403.vercel.app/>

User Management CRUD App — JavaScript, AJAX, Tailwind CSS

- Built a user management app with full Create, Read, Update and Delete functionality.
- Used AJAX/API requests to manage user data dynamically without full page reloads.

Live Demo: <https://ajaxmethods.netlify.app/>

Drag & Drop Task Manager — JavaScript, jQuery, Tailwind CSS

- Developed an interactive task manager with drag-and-drop functionality.
- Built a responsive, user-friendly interface using Tailwind CSS.

GitHub: <https://github.com/ahmadali7403/drag-n-drop-j-query.git> Live Demo: <https://mobilesupporteddraganddrop.netlify.app/>

Weather App — JavaScript, Weather API, HTML5, CSS3

- Built a weather app that retrieves and displays live data from an external API.
- Implemented API integration with dynamic UI updates based on fetched data.
